Mininor Potty

KIND+JUGEND
INNOVATION
AWARD
NOMINATED

2022

Training potty with backrest. The potty has a lid that can be used as a step stool. The potty has a non-slip soft material on the bottom and on the lid. The hard plastic parts have an antibacterial function that kills 99.9% of common bacteria such as E. Coli. The tray inside can be removed for easy cleaning. When we designed the potty, we wanted a visually simple design with sleek lines. The traditional way of designing potties did not allow for this, as a double wall is required to support both the tray inside and the base. We "flipped" the design so that there is only a single outer wall, giving the product a much lighter visual expression. The potty then fits well with the design language of other Mininor products, such as the bathtub.

Nino – modular Furniture

KIND+JUGEND
INNOVATION
AWARD
NOMINATED

2022

nino is a range of multifunctional wooden furniture. Our furniture is designed to change its role depending on the needs of the user. They are designed to stimulate the imagination of the child and at the same time look modern and simple.

You can easily build a chest of drawers, a table, a nightstand, and taken separately, they are perfect as stools for children and adults. The connection of modules does not require tools, the structures from them are stable and safe for a child. Colors have a strong impact on our senses. The simple design of nino makes it easy to change the legs and drawer. We offer 9 colors of drawers and legs and 2 colors.

FELIE

KIND+JUGEND
INNOVATION
AWARD
NOMINATED

2022

FELIE grows with the child and can easily be converted into a junior bed or children's sofa.

To allow toddlers to climb in and out of the crib independently, Paidi has developed a revolutionary mechanism that removes three bars on the side of the crib. The mechanism's knobs are soft and pliable, providing a child-friendly environment. Removing the bars is simple, quick and almost silent. And all this in compliance with the strictest safety requirements.

FELIE is equipped with a 4-position height-adjustable AIRWELL® spring slatted base, which allows air circulation.

2022

MOES is a Belgian brand that develops sustainable design toys. The aim is to develop children's creativity and motor skills in a fun and original way. All items are made for free play and fit into any interior. MOES products not only encourage motor skills and creativity, but also invite interaction. In addition, the products are suitable for different age groups and grow with the children. The material used is very soft and light and has a durable character. The products do not contain any toxic substances. We pay attention to sustainability and have found the right material for our products. The products can be recycled without CO2 emissions.

All products have a multifunctional purpose. Children can play with it as they like, but besides playing, the toy can also be used as a chair, footboard, etc. to help them in their daily activities.

Balance beam TipiToo

KIND+JUGEND
INNOVATION
AWARD
NOMINATED

2022

TipiToo is our new balancing beam for kids, an activity toy that promotes physical activity and movement, improves muscle strength and naturally strengthens balance and body awareness. Most balance beams only come with a flat surface, while the TipiToo offers much more versatility. While one side of the balance beam is smooth, the other side has a variety of surfaces including:

Horizontal lines - String - Raised dots.

The TipiToo's different surfaces provide a greater challenge and massage important pressure points on the child's feet, promoting blood circulation and relaxation after a day of school or play.

FIRGI WHALE POUCH TOP

KIND+JUGEND
INNOVATION
AWARD
NOMINATED

2022

Haven't you experienced spilling the bag of drinks when the baby squeezes it too tight and gets their clothes dirty? Especially when you are on the road with them. Even for adults, it's hard not to spill drinks in the car.

Just put on a whale bag. Let your child enjoy their juice in the jolting car, in the stroller, or at a picnic. Firgi has found through thousands of experiments that platinum silicone has the best hardness and elasticity for babies!

Protect your baby's weak little teeth, lips and gums by covering the hard plastic spout with the whale bag attachment. Babies will begin to enjoy their meal with the cute little whale friend. It is universal fit.

KneeGuardKids 4 - the car seat footrest

KIND+JUGEND
INNOVATION
AWARD
NOMINATED

2022

KneeGuardKids 4, the crash-tested footrest, helps maintain the child's correct position in any high-back seat when traveling by car, regardless of distance.

The footrest prevents numbness in the child's legs by eliminating leaning against the edges of the car seat, which causes pressure under the knees.

Importantly, when supporting the legs, the KneeGuardKids ensures that the child's back is against the seat and the head remains within the protected area.

PL: PODKÓŹEK DO FOTELIKA SAMOCHODOWEGO

VORTEILE:
- Entlastet Muskeln und Gelenke - die Beine des Kindes ruhen während der Fahrt
- Unterstützt die Durchblutung und beseitigt Taubheitsgefühle in den Beinen
- Hilft, eine angenehme und sichere Position im Autositz zu erreichen
- Reduziert die Belastung der Knie und Oberschenkel, Krämpfe werden verhindert

AVANTAGES:
- Soulage les muscles et les articulations - les jambes de l'enfant se reposent pendant le voyage
- Favorise la circulation sanguine et élimine les engourdissements dans les jambes
- Aide à maintenir une position confortable et sûre dans le siège de la voiture
- Réduit la tension des genoux et des cuisses, évite les crampes

BENEFICI:
- Allevia i muscoli e le articolazioni - le gambe del bambino riposano durante il viaggio
- Supporta la circolazione sanguigna ed elimina i formicolii nelle gambe
- Aiuta a mantenere una posizione confortevole e sicura nel seggiolino per la vettura
- Riduce la tensione sui ginocchi e sulle cosce, previene le crampie

BENEFICIOS:
- Alivia los músculos y las articulaciones - las piernas del niño descansan durante el viaje
- Apoya la circulación sanguínea y elimina los entumecimientos en las piernas
- Ayuda a mantener una posición cómoda y segura en el asiento del coche
- Reduce la tensión en las rodillas y las piernas, previene los calambres

KORZYSCA:
- Obciążenie mięśni i stawów - nogi dziecka odpoczywają w czasie jazdy
- Wspiera krążenie krwi i eliminuje odczucia mrowienia w nogach
- Pomaga utrzymać wygodną i bezpieczną pozycję w foteliku samochodowym
- Zmniejsza napięcie w kolanach i udach, zapobiega skurczom

Turai360 SL Klimax

KIND+JUGEND
INNOVATION
AWARD
NOMINATED

2022

Optimal seating climate for your offspring!

Our Turai360 SL Klimax (ECE R129/03, 40-105 cm) impresses with a real innovation: The child seat provides pleasant ventilation on hot summer days - that is, the warm air is dissipated - and in winter for a comfortably warm seat feeling. The system is activated by an integrated sensor that responds to pressure as soon as a child is seated in the seat; it is operated via the power supply in the car. A practical feature is that the system is automatically regulated while the car is in motion. As soon as a temperature below 5° C or above 30° C is measured in the seat body, ventilation or heating takes place.

In addition to Isofix and stand attachment, the Turai360 SL Klimax grows with the little passengers. 360° rotation for easy access.

KIDFIX i-SIZE

The KIDFIX i-SIZE is the first climate-neutral car seat from Britax Römer and will be available from October 2022. Sustainability played a central role in the development of the KIDFIX i-SIZE. Less material, sustainable packaging, local suppliers and Made in Germany make the KIDFIX i-SIZE one of the most sustainable products on the market. KIDFIX i-SIZE is the flagship product of GREEN SENSE, Britax Römer's first sustainable collection.

The fabrics in the GREEN SENSE collection are made from 100% recycled PET plastic bottles. The launch of KIDFIX i-SIZE and the GREEN SENSE collection are the first steps towards a more sustainable future and part of Britax Römer's sustainability strategy. The goal is to make Britax Römer products more sustainable step by step in order to offer the most sustainable and safest products.

Babyseat, Tray + Safety Bar from recycled fishnet

KIND+JUGEND
INNOVATION
AWARD
NOMINATED
2022

Klapp Tray, Safety Rail and the Klapp Baby Seat for newborns will be launched in July/August. They are all made of 50% recycled fish net obtained from post-industrial waste from the North Sea.

Each year, 282 million tons of plastic waste is produced worldwide, but only 15% of that is recycled. Considering the enormous amount of baby and toddler products made from plastics each year, we really need to stop adding more new fossil resources, and instead use what is already abundant.

KAOS has developed a material mix of 50% recycled fish net from post-industrial marine waste and 50% virgin PP (polypropylene). The material complies with the European standard for food safety. The standard in our industry is 100% new/fossil plastic (polypropylene) and 0% recycled post-industrial waste.

GEO GESCHIRR – GEO TABLEWARE

KIND+JUGEND
INNOVATION
AWARD
NOMINATED

2022

The new GEO tableware from LÄSSIG is made from plant fibers and is predominantly bio-based. Unlike conventional plastics, the bioplastic developed by LÄSSIG especially for this product is not made from scarce petroleum resources, but from sweet grasses such as sugar cane, which account for 85 percent of the total. GEO tableware thus offers a sustainable alternative to disposable or petroleum-based plastic tableware and conserves valuable resources. At the same time, the innovative biocomposite is melamine- and BPA-free. Different geometric shapes and three powdery colors ensure harmonious and diverse combinations when choosing plates, bowls, cups and spoons - for a unique and modern design at the table and to the delight of young and old. LÄSSIG GEO tableware is certified according to DIN CERTCO and the international standard ASTM D 6866:2020-02 with 85% organic content.
