

RETHINK MATERIALS

What remains after ORGATEC is part of a responsible working world.

ORGATEC is the leading trade fair for future-oriented work-spaces and responsible material use. With TRASH GALORE, you ensure that booth construction materials are not disposed of after the show, but meaningfully reused.

What we do for ORGATEC exhibitors

1. Reuse of booth construction materials

Flooring, walls, furniture components and custom-built elements are passed on to social, non-profit or creative projects – regionally and based on actual needs.

2. End-to-end handling

From coordination with your booth builder to direct pick-up at the stand. Dismantling included on request.

3. Reuse Reporting

Documentation of material volumes, CO2 savings and recipient projects – structured, transparent and compatible with sustainability, ESG and CSR reporting (GRI & ESRS).

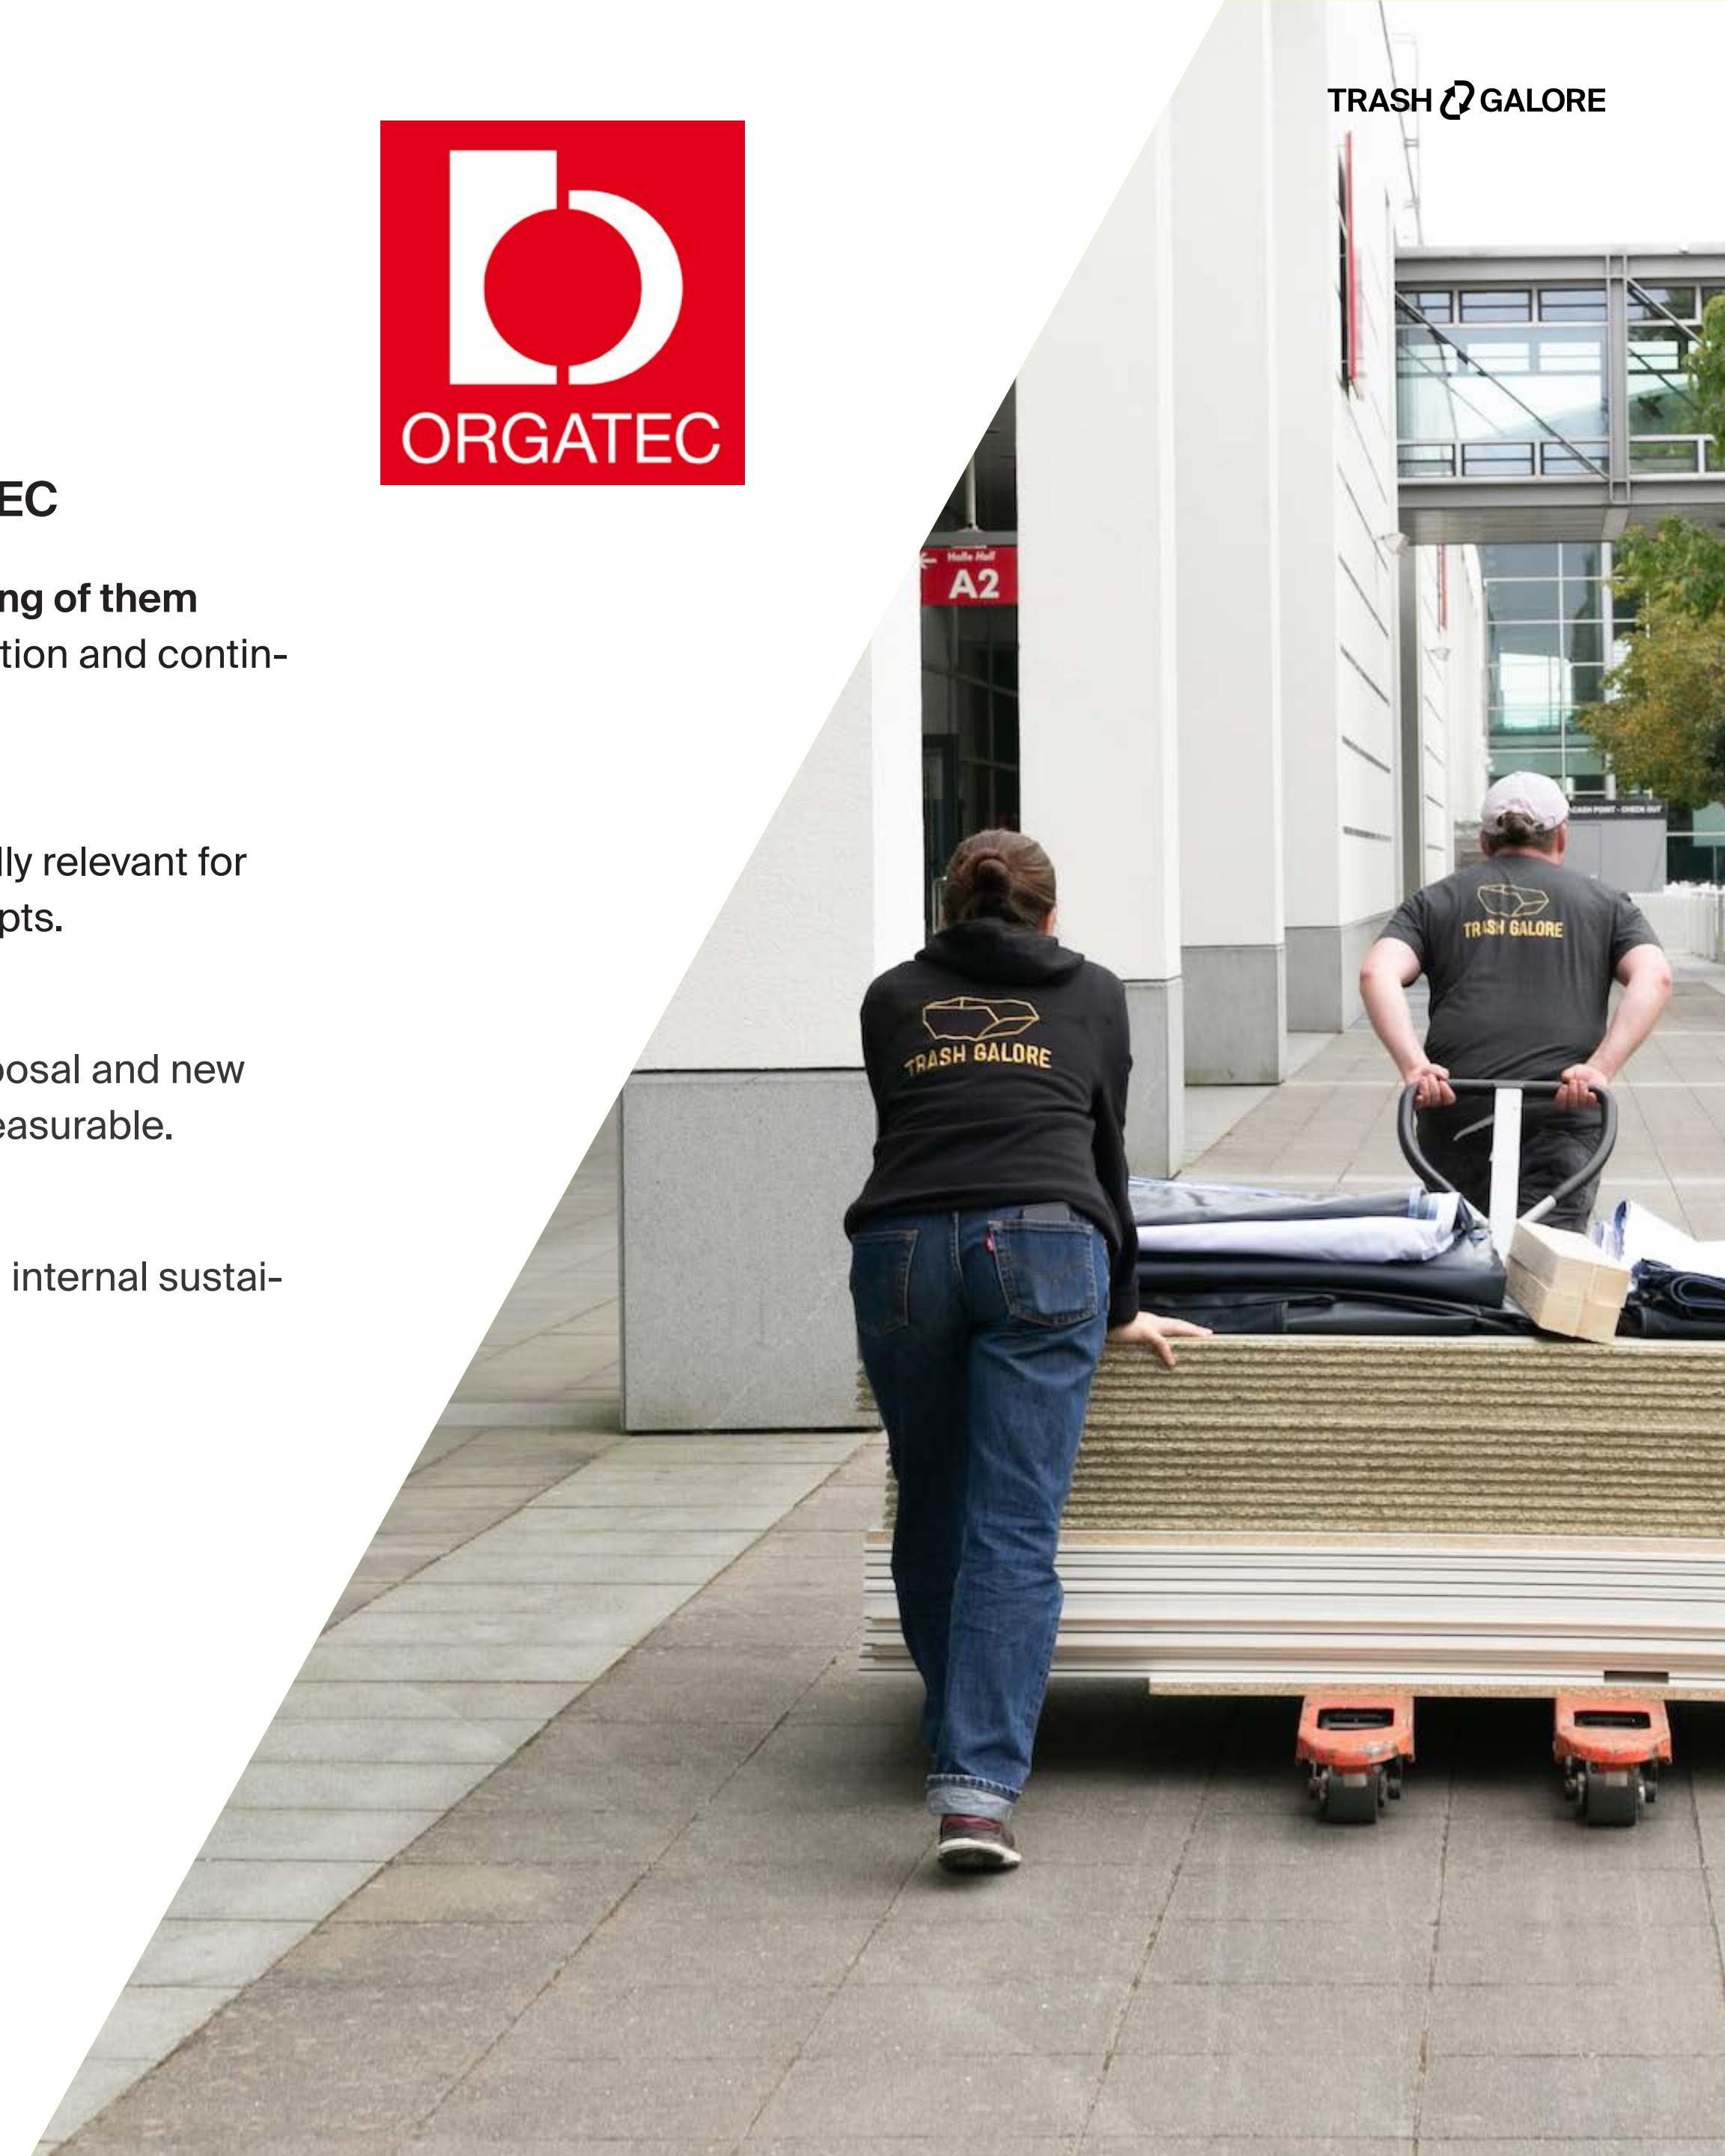

4. Communication with substance

We make reuse tangible – with facts, images and reuse stories that can be communicated credibly.

Why reuse makes sense at ORGATEC

- **Preserve resources instead of disposing of them**
High-quality materials remain in circulation and continue to be used.
- **Reduce costs**
Less disposal, less transport – especially relevant for modular and custom-built stand concepts.
- **Reduce emissions**
Reuse avoids CO2 emissions from disposal and new production. We make these savings measurable.
- **Make sustainability planable**
Reliable data for reporting, tenders and internal sustainability targets.

USE CASE: INTERZUM × TRASH GALORE

Material reuse in the furniture & interior industry works.

What we achieved with an interzum exhibitor:

→ **12,240 kg of materials reused**

OSB and structural timber were returned to the material cycle.

→ **7,799 kg CO2 avoided**

Through shorter transport routes and reuse.

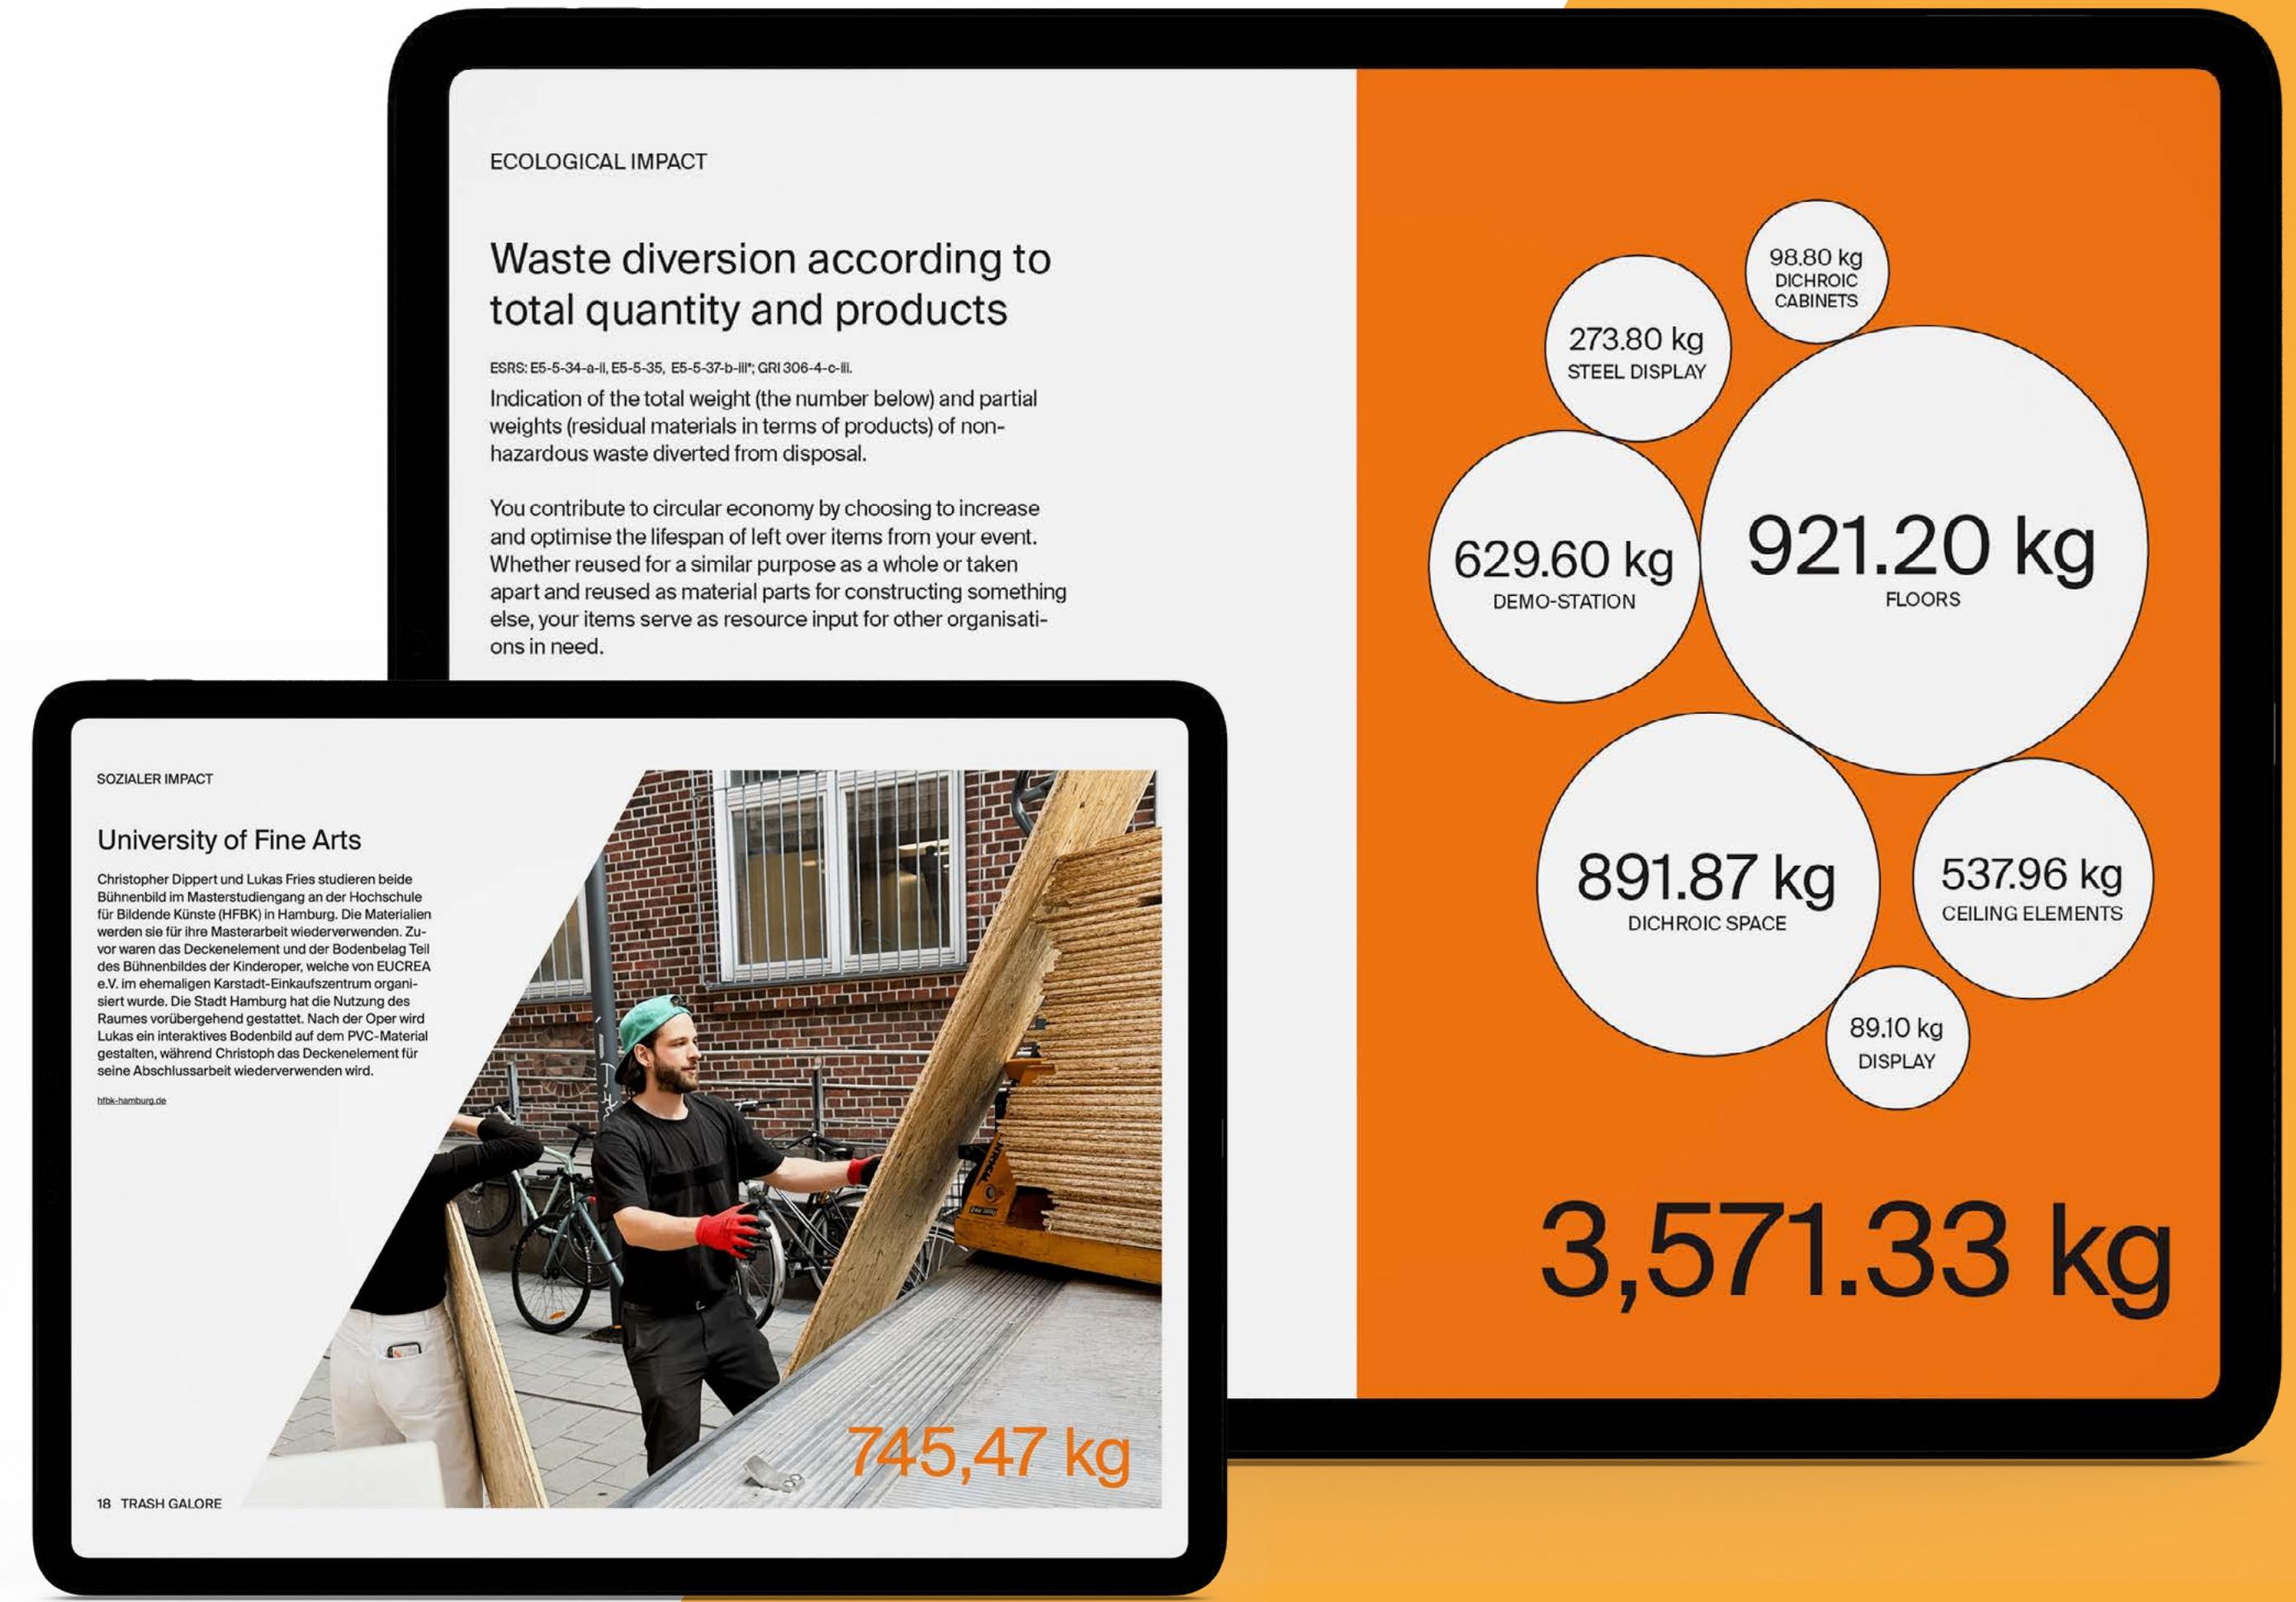

→ **Cost advantage compared to in-house recycling**

Only around two-thirds of the cost compared to transporting the materials to EGGER's own recycling facility.

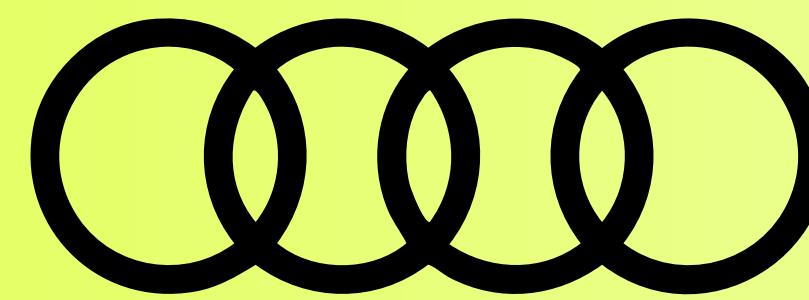

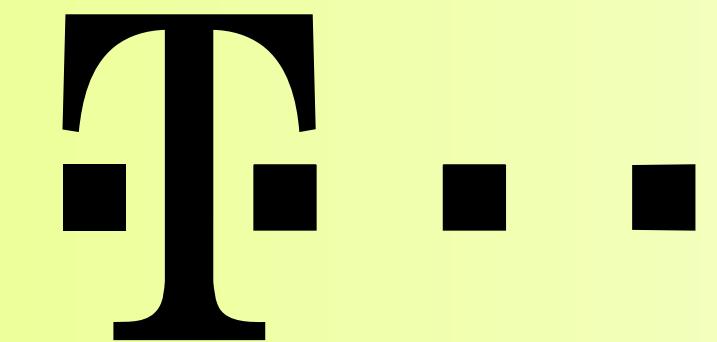

→ **2 local recipient projects**

Materials were passed on to Treibhaus e. V. and Materialbuffet – used in social, cultural and educational contexts.

Note: For early cost planning, we provide a simple cost estimation. This helps you assess potential reuse costs at an early stage.

These brands trust
in TRASH.

Deloitte.

Contact

Think about reuse early – we support you.

We provide non-binding advice on effort, costs and impact – gladly in coordination with your booth builder.
